

Tisch Library Strategic Plan 2011-2014

Underlying Principles

March 23, 2011

Alignment with the University Mission:

Tisch Library's services and collections support the university mission. We evaluate our projects and programs in terms of convergence with university priorities.

Collaboration:

Tisch Library is committed to building strong collaborative partnerships with the other Tufts libraries, Tufts academic support units, the Boston Library Consortium, and other academic libraries. These collaborative partnerships are critical to meeting our users' needs and responding to the changes in higher education and scholarly publishing.

Client Focus:

Tisch Library is committed to meeting the curriculum and research needs of all Arts, Sciences and Engineering user groups.

Culture of Assessment:

Tisch Library is built on a culture of assessment. We are a data-driven organization that is committed to assessing user needs and including our users in the development of our services.

Staff Development:

Tisch Library acknowledges the increasing level of expertise required of staff, and we are committed to their continuing education. Our goal is to be valued as experts in what we do, both within and outside the library.

All comments are welcome.
